

# THE ORGANWISE GUYS® ACTIVITY

Hey team,

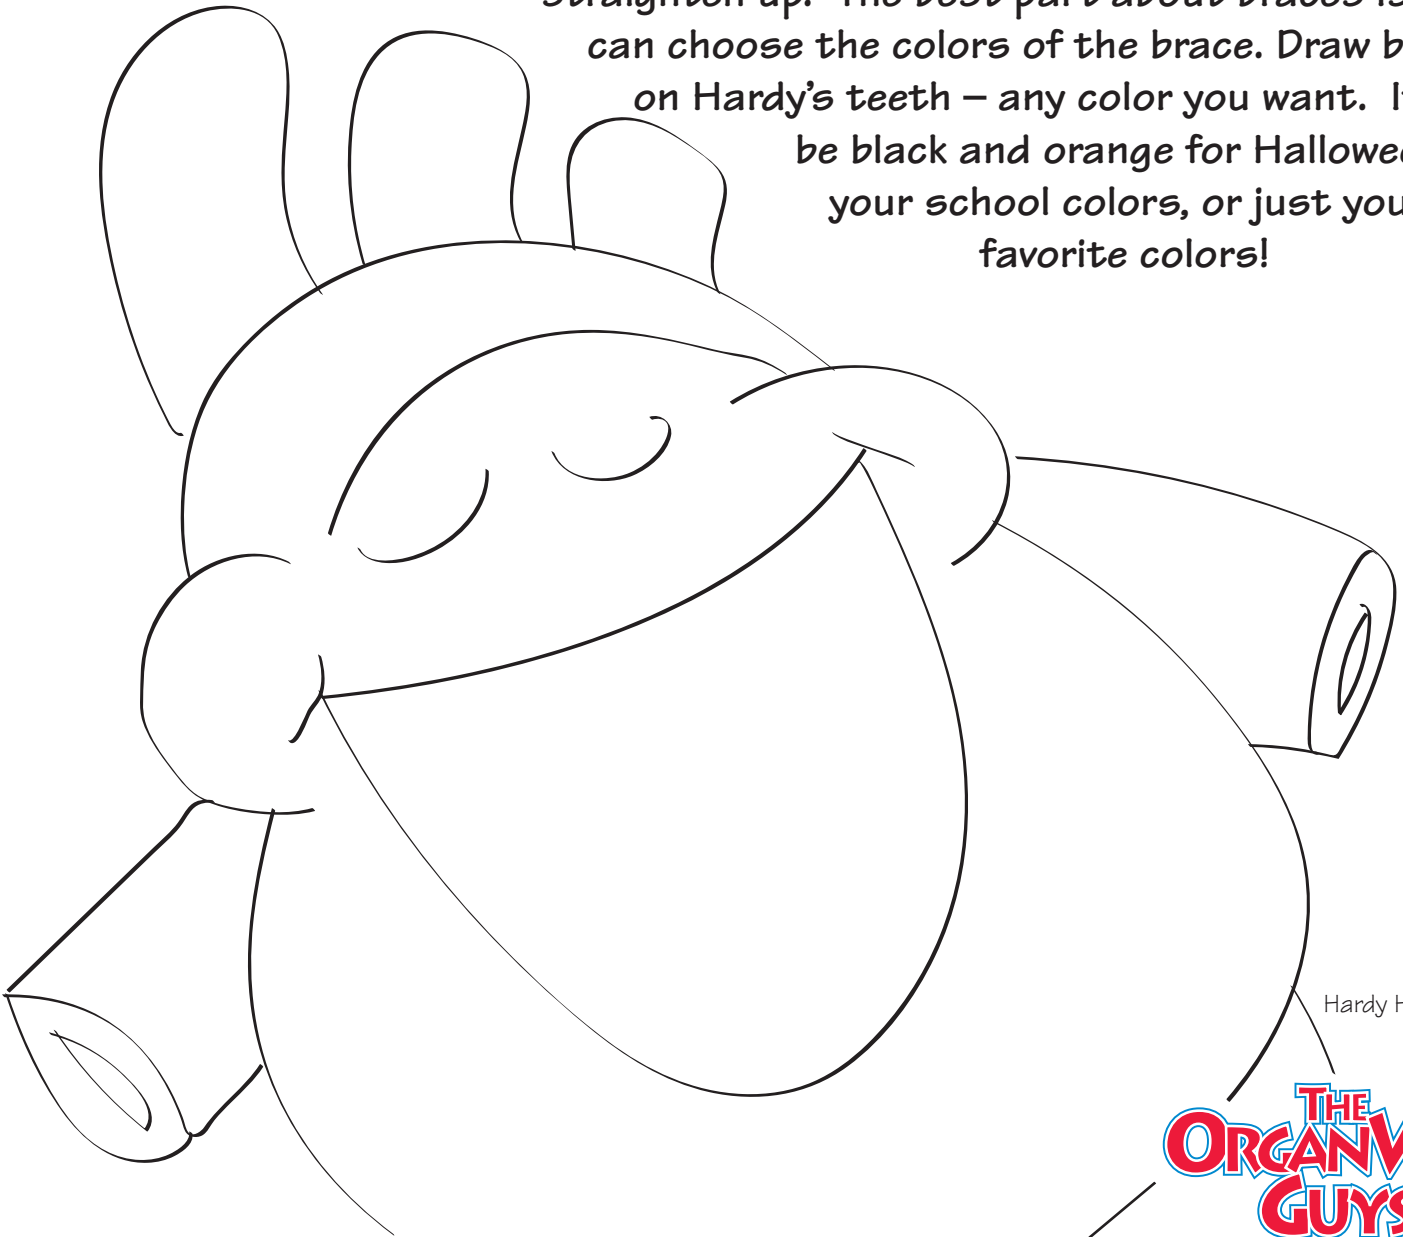

This month is Halloween, which means there is a lot of candy floating around. While we OrganWise Guys Members are careful not to have too much candy, we also know that even a little candy can contain a lot of sugar. Unfortunately, if sugar isn't brushed away, it can team up with plaque to cause tooth decay. We don't want tooth decay, we want to keep healthy teeth! So be extra sure that you are brushing and flossing your teeth! Don't be afraid to swish around some mouthwash either!

Talk to you later,  
**Calci**

Calci M. Bone®

Orthodontists are the doctors who put braces on our teeth to help them straighten up. The best part about braces is you can choose the colors of the brace. Draw braces on Hardy's teeth – any color you want. It can be black and orange for Halloween, your school colors, or just your favorite colors!
