

# COLOR ME ORGANWISE

Hey team,

This month is Halloween, which means there is a lot of candy floating around. While we OrganWise Guys Members are careful not to have too much candy, we also know that even a little candy can contain a lot of sugar. Unfortunately, if sugar isn't brushed away, it can team up with plaque to cause tooth decay. We don't want tooth decay, we want to keep healthy teeth! So be extra sure that you are brushing and flossing your teeth! Don't be afraid to swish around some mouthwash either!

Talk to you later,  
**Calci**
